

The Mathematical Theory of Black Holes, 1992, 646 pages, Subrahmanyan Chandrasekhar, 0198520506, 9780198520504, Oxford University Press, 1992

In 1935, Subrahmanyan Chandrasekhar challenged the prevailing theory of the day by suggesting that not all stars die the same death. He proposed that stars with more than 1.4 times the mass of the sun were compressed by their own gravitational forces into dense, dark objects. Winner of the 1983 Nobel Prize for Physics, Chandrasekhar here describes in exhaustive detail how a rotating black hole reacts to gravitational and electromagnetic waves--the forces associated with an infalling star. The author provides background material with a survey of the analytical methods necessary for the study of solutions that describe a rotating black hole, a derivation of the Schwarzschild metric of essential space-time features, and an account of how gravitational waves are scattered and absorbed. This is followed by a discussion of the Reissner-Nordstrom solution which predicts external and internal horizons and prepares the reader for the author's thorough treatment of the Kerr family of solutions. Beginning with the derivations of the Kerr metric, Chandrasekhar goes on to describe space-time in a Newman-Penrose formulation. He investigates such elements of the Kerr solution as geodesics and space-time--including the possibility of extracting energy from a rotating black hole, perturbations of the black hole with Maxwell's equations and the propagation of electromagnetic waves, gravitational perturbations, fields of spin-1/2 both massive and massless. His analysis shows that all relevant equations of mathematical physics allow explicit solutions in Kerr geometry. In the last chapter, Chandrasekhar deals with two other classes of solutions: axisymmetric black hole solutions which are static but not asymptotically flat, and solutions which provide for an arbitrary number of isolated black holes, the relativistic analogue of the static equilibrium arrangement of Newtonian gravitational theory. This unique work encompasses not only the complete range of what is currently known about the properties of black holes, but the directions of future research.

Observational Evidence for Black Holes in the Universe Proceedings of a Conference Held in Calcutta, India, January 10-17, 1998, Sandip K. Chakrabarti, 1999, Mathematics, 399 pages. A conference on 'Observational Evidence for Black Holes in the Universe' was held in Calcutta during January 10-17, 1998. This was the first time that experts had gathered to.

Black holes a traveler's guide, Clifford A. Pickover, Apr 6, 1996, Science, 210 pages. BLACK HOLES A TRAVELER'S GUIDE Clifford Pickover's inventive and entertaining excursion beyond the curves of space and time. "I've enjoyed Clifford Pickover's earlier books.

Quantum mechanics , Wojciech Rubinowicz, 1969, Science, 584 pages. .

Black Holes , , 1996, Juvenile Nonfiction, 45 pages. Discusses how we know about black holes, how they affect matter around them, and what would happen if you got inside one..

Black holes in space , Patrick Moore, Iain Nicolson, 1974, Science, 126 pages. .

Colliding plane waves in general relativity , Jeremy Branson Griffiths, 1991, Science, 232 pages. The collision and non-linear interaction of plane waves in Einstein's general theory of relativity has received considerable attention in recent years. Initially, it was widely.

Radiative Transfer , Subrahmanyan Chandrasekhar, 1960, Science, 393 pages. This book by a Nobel Laureate provides the foundation for analysis of stellar atmospheres, planetary illumination, and sky radiation. Suitable for students and professionals in.

Black Holes The Membrane Paradigm, Kip S. Thorne, Richard H. Price, Douglas A. MacDonald, Jan 1, 1986, Science, 367 pages. A pedagogical introduction to the physics of black holes. The membrane paradigm represents the four-dimensional spacetime of the black hole's "event horizon" as a two.

Black hole physics , Venzo De Sabbata, Zhenjiu Zhang, 1992, Science, 426 pages. The basic subjects and main topics covered by this book are: (1) Physics of Black Holes (classical and quantum); (2) Thermodynamics, entropy and internal dynamics; (3) Creation.

Black Holes The End of the Universe?, John Gerald Taylor, 1974, Black holes, 174 pages. This book is the first of its kind to describe what has been called the most destructive phenomenon in the universe -- an all-powerful invisible star whose menace is mind-boggling..

Hydrodynamic and Hydromagnetic Stability , Subrahmanyan Chandrasekhar, 1961, Science, 652 pages. Lucid examination of the Rayleigh-Bernard problem; clear coverage of the theory of instabilities causing convection..

Black Holes An Annotated Bibliography, 1975-1983, Steven I. Danko, Jan 1, 1985, Reference, 282 pages. No descriptive material is available for this title..

Internal Structure of Black Holes and Spacetime Singularities An International Research Workshop, Haifa, June 29-July 3, 1997, Lior M. Burko, Amos Ori, 1997, Science, 534 pages. The physics of black holes and spacetime singularities is now a well established area of research in gravitation theory. Over recent years researchers have begun to study the.

The Baker's Wife A Musical : Vocal Selections, , Aug 22, 2006, Music, 56 pages. 6 selections from Stephen Schwartz's quietly acclaimed musical about a small town and their baker, or lack thereof. Includes: Chanson вЂŸ Gifts of Love вЂŸ If I Have to Live Alone The Longest Day June 6, 1944, Cornelius Ryan, 1999, World War, 1939-1945, 350 pages. Shortly before the inevitable Allied assault on Fortress Europe in 1944, Field-Marshal Erwin Rommel remarked to an aide The first 24 hours of the invasion will be decisive French , Clive Bell, 2006, French language, 96 pages. This volume covers the 2006 subject specifications for all exam boards. The text is laid out in 'sound bite' boxes to aid recollection, with clearly labelled diagrams to add Examines the prevalence and psychological damage associated with emotional abuse, counseling readers on how to overcome the past while rebuilding a self-image, and including in.
